Ms. Cash,

Thank you for the reply. I received a letter today from Sharon Green. It contains closeout forms on Assistance Agreement No.: - XP-97579701. Is this the same item we are talking about? If so, I will talk to our clerk tonight and work to get this completed.

Thank you.

Yes, we can do most of this by e-mail. I did speak with Mr. Archer, and he told me that he would deliver my message to you. I have a copy of the Inspection Report done by Tetra Tech which states that no work has been done on the project since last year. We need to get updated information on what work has and has not been completed and the reason why the work is incomplete. If it is a matter of delays caused by weather, contractors, etc., we need to know so that we can extend the project to a date certain when it will be completed.

If on the other hand, there is a problem with Laurelville meeting the required match for the project, we have another problem. The conditions of the grant were that Laurelville provide 45% of the costs and EPA would provide 55%. EPA funds were to be spent in conjunction with Laurelville's match (in the percentages shown). Hopefully, whatever the problem is, we can work together to resolve it.

Re: Grant

Ms. Cash,
I will try to resolve this matter. Because of a hearing problem I would like to do this via email. Did you have a recent conversation by phone with Mr. Bill Archer, was that positive?
Let me know where to start!
Thank you.

Unfortunately, the former Mayor accepted this grant in the name of the Village of Laurelville and the Village is accountable. I would like to speak with you so that we may find a solution which is acceptable to Laurelville as well as the U.S. EPA. Please call me at your earliest convenience.
